

Famic Technologies Presents Automation Studio™ at the Offshore Technology Conference 2013

(Montreal, Quebec) April 24, 2013 – [Famic Technologies Inc.](http://www.famictech.com), software engineering and industrial automation specialist, is presenting its latest all-in-one design and simulation software solution, Automation Studio™, at the Offshore Technology Conference (OTC) from May 6th to 9th in Houston, Texas. Live and interactive presentations of Automation Studio™ will demonstrate how it improves efficiency and significantly reduces downtime for bottom line results in the Offshore & Marine and Oil & Gas industries.

Maintenance and safety is always a priority for offshore operations. For a personalized demonstration of how to effectively analyze failure and risk with Automation Studio™, visit [Booth #7704 in the Reliant Arena](#). This latest version of the software has more intuitive design features for quicker and more accurate design and simulation capabilities, facilitating its use in many departments as well as being an established communication tool for all levels of the company, resulting in a high return on investment.

As an effective user-friendly CAD software tool, Automation Studio™ is best known for its trade-oriented features and advanced simulation technology. This is a stand-alone flexible solution for system design, realistic simulation and modeling in a virtual environment, which also serves to train and develop personnel on the ins-and-outs of systems in order to make timely decisions with safety, reliability and profitability in mind.

###

About Famic Technologies

Founded in 1986, Famic Technologies offers a full range of quality products and services in the fields of software engineering and industrial automation. It develops, integrates and markets CAD and simulation software solutions for electrical, hydraulics, pneumatics, automation and controls applications which support design, operations, management and training. Famic Technologies provides innovative software solutions to help engineers, maintenance personnel and trainers substantially increase their efficiency in systems design, maintenance and training. Since January 2012, Famic Technologies has opened a sales and support office in Germany to better serve customers' needs in Europe. www.famictech.com

About Automation Studio™

Automation Studio™ is a leading software solution developed by Famic Technologies that helps reduce machine time-to-market and optimizes the entire workflow of a project or product lifecycle. It seamlessly integrates system design engineering, simulation, prototyping, testing, troubleshooting, diagnostics, maintenance, service, training, and documentation, and is offered in 11 languages. Automation Studio™ is among the most complete trade-oriented system design and simulation software solutions in the fields of fluid power, electrical and automation. www.automationstudio.com
